Web with Python   Continue
Transectech   *Lahore, Pakistan*

- Same as previous.

PROJECTS

Fitness website. Built an Fitness app by using Django Framework, HTML, CSS and Bootstrap and JS for front-end, Python as a back-end and Sqllite3 for database. In this website user can perform CRUD Operations After login.

TravelWithArslan. Built an front-end for Travel website. This my own working and I published it on GitHub.

ProductivePro Built an productivity tool named, ProductivePro and it's also my own working and published it by using free hosting.

EXTRA-CURRICULAR ACTIVITIES

- Frequently using different AI tools for my experience and getting help for my work and handling YouTube channel created by myself and post shorts related to Tech.

- I really liked cricket and played it frequently.

LEADERSHIP

- I think I have good leadership skills, I have led my team several times and we also see good results. It is only thought it might me wrong, but I need some time to know about team members and their abilities after that I am able to give them tasks according to their ability.
